Contents

ACKNOWLEDGEMENTS	VI
<i>List of figures</i>	vii
<i>List of tables</i>	vii
<i>Acronyms and abbreviations</i>	viii
1. INTRODUCTION	1
1.1 Background to the study sites	2
1.2 Background to the cotton industry in Kenya	4
1.3 Synopsis of the problem	5
1.4 Justification	7
1.5 Methodology	7
1.6 Scope and limitations	8
2. THEORETICAL FOUNDATIONS AND CONCEPTUAL FRAMEWORK	11
2.1 THEORETICAL FOUNDATIONS of political economy	11
2.2 CONCEPTS AND DEFINITIONS	12
3. COTTON PRODUCTION AND MARKETING	21
3.1 COTTON PRODUCTION and marketing in Kenya	31
3.2 THE GLOBAL COTTON PRODUCTION and marketing environment	32
3.3 TRADE PROSPECTS UNDER AGOA	33
4. AGRICULTURAL BIOTECHNOLOGY AND AGRARIAN CHANGE	37
4.1 Global trends in agricultural biotechnology	38
4.2 State of biotechnology in Kenya	40
4.3 Policy and regulatory environment for biotechnology	41
5. EXTENT AND CIRCUMSTANCES UNDER WHICH BT. COTTON CAN BE HARNESSSED	45
5.1 Lessons and evidence	45
5.2 Efficiency	48
5.3 Sustainability	53
5.4 Equity and access	57

6. HARNESSING BT. COTTON FOR KENYA'S SMALLHOLDER FARMERS	61
6.1 Policy and institutional implications	61
6.2 Access to credit	62
6.3 Farmers' organizations	63
6.4 Seed multiplication, certification and distribution infrastructure	64
6.5 Access to information, technology adoption factors and perceptions	65
6.6 Biosafety measures	71
6.7 Implication of Bt. cotton on poverty alleviation	72
6.8 Recommendations and conclusion	72
6.9 Areas of further research	74
<i>Appendix</i>	77
<i>References</i>	79

Acknowledgements

The production of this monograph benefited from a wide range of people. Critical and constructive comments from Dr. Eric Ross, Dr. Auma Okwany and Dr. Haroon Akram-Lodhi (The International Institute of Social Studies, the Netherlands) are recognized and appreciated. We are also grateful to Hannington Odame (ISS) for useful insights and invaluable comments on the technical aspects of this monograph.

We extend a vote of thanks and profound gratitude to John Komen and Dr. Jose Falck-Zepeda of the International Service for National Agricultural Research (ISNAR, the Netherlands) for intellectual and institutional support and for tirelessly reviewing various drafts of this publication.

We wish to extend special thanks and gratitude to key informants in the area of biotechnology and biosafety whose contribution has enriched this publication. In particular, we wish to acknowledge Prof. James Ochanda (Biosciences), Dr. Charles Waturu (KARI), Dr. Benjamin Odhiambo (KARI), Dr. Charles Kedera (KEPHIS), Dr. Phelix Majiwa (AATF), and Kinyua Mbijjewe (Monsanto). We are also grateful to Cheick Mbacke, Joe Devries and John Lynam of the Rockefeller Foundation.

We are also indebted to a number of persons who directly or indirectly made collection of empirical data for this monograph possible. We cannot mention everyone here by name, but omission should not imply our lack of recognition for his or her support. In particular we wish to thank Edwin Omil (Manager Mwea Ginney), Wilberforce Mwangi (Divisional Agriculture Officer, Mwea), Njoroge Mutula (Divisional Agriculture Officer, Mwea), Jomo Ogwang (District Crops Officer, Busia), Mafundo Ambrose (Divisional Crops Officer, Funyula), Johnstone Rono (District Agriculture Officer, Bondo), Morris Omole (Chairman Owila Young Farmers and Traders Youth Group, Madiany), Philip Mukwana (Divisional Agriculture Officer, Madiany) and William Kouko (Centre Director, KARI, Kibos). Finally, we wish to acknowledge Mary Muthoni and Harrison Maganga of ACTS for producing the monograph.

The ideas and views expressed in this monograph are exclusively attributable to the authors and do not in any way represent opinions or positions of the individuals and institutions acknowledged.

List of figures

- Figure 1: A framework of political economy of science and technology
- Figure 2: Seed cotton production trends in Kenya 1965-1999
- Figure 3: Cotton production costs in Kenya
- Figure 4: World GM crop area 1996-2003
- Figure 5: Dominant GM crops in 2003
- Figure 6: Cost of applied pesticides for adopters and non-adopters of Bt. cotton in South Africa 1999-2000
- Figure 7: Average yield per hectare of Bt. cotton and non-Bt. cotton farmers in S. Africa 1999-2000
- Figure 8: Pesticide use in Shebei and Shandong provinces of China in 1999
- Figure 9: Yields of non-Bt. cotton and Bt. cotton under **dry land** conditions in S. Africa 2000/2001
- Figure 10: Yields of non-Bt. cotton and Bt. cotton under irrigation in South Africa 2000/2001
- Figure 11: Pesticide poisoning in Shebei and Shandong provinces in 1999

List of tables

- Table 1: Summary of conditions favouring adoption of Bt. cotton. Comparing Kenya and the case study countries

Acronyms and abbreviations

AATF	Africa Agricultural Technology Foundation
ABDR	Asian Biotechnology and Development Review
AGOA	African Growth Opportunity Act
CBD	Convention on Biological Diversity
CDP	Cotton Development Programme
CL&SMB	Cotton Lint and Seed Marketing Board
D&PL	Delta and Pineland Company
EU	European Union
EPZs	Export Processing Zones
GMOs	Genetically Modified Organisms
GoK	Government of Kenya
HDR	Human Development Report
ICAC	International Cotton Advisory Committee
IPRs	Intellectual Property Rights
IRMA	Insect Resistant Maize for Africa
ISS	Institute of Social Studies
ISNAR	International Service for National Agricultural Research
KARI	Kenya Agricultural Research Institute
KEPHIS	Kenya Plant Health Inspectorate Service
KIPPRA	Kenya Institute of Public Policy Research and Analysis
NARC	National Alliance Rainbow Coalition
NBC	National Bio safety Committee
NGO	Non-governmental Organization
R and D	Research and Development
SSA	Sub-Saharan Africa
TRIPS	Trade Related Intellectual Rights
USAID	United States Agency for International Development
WTO	World Trade Organization
